

ITRC – License Management For Oracle Cloud

Overview

ITrooper’s License Management Module + Optimization Services help organizations control Oracle Cloud license usage, reduce unnecessary spend, and maintain continuous compliance with real-time insights.

Manage Licenses by

How It Works

ITRC – License Management Platform

- Real-time license consumption tracking by user, role & privilege
- Native dashboards highlight inactive, overlapping, or excessive access
- Visibility into seeded + custom roles across all environments
- Automated reports ensure audit readiness and cost control

ITRS – License Optimization Services

- Achieve \$750K–\$1M in typical annual savings
- Establish a clean security baseline via custom role + form design
- Use our prebuilt SoD-compliant role library for rapid deployment
- Sustain optimization through continuous monitoring & validation
